

## Collocation Hosting,

---

We are pleased to be able to offer co-location facilities to our customers in Docklands, London.

Locate your own-server in one of our Racks at one of our hosting facilities in Docklands, London. Our co-lo provides you with the unrivalled reliability, power, flexibility and advanced functionality that can only be achieved through a server dedicated to serving the needs of your business, fully under your control over hardware, software and operating system. Our Facilities are fed from our own Backbone which has good direct transit onto at least three deferent providers so you are close to major ISPs.

- 1u (19"w 1.75"h) Rack Space in Docklands, Hex, Sov or Telehouse
- 1 × 240V 5A IEC power feed
- 1 Dedicated 100Mb/s Switch Port
- 60Gbyte data transfer per month (higher of the TX and RX counters for the billing period).
- 1 fixed routed IP Address from our own Ripe range or we can assist you gain your own IP (PI) range from Ripe.
- We operate our own AS (as42004) so we can provide custom hosting solutions to your own requirements.
- Filtered Uninterruptible Power Supply (UPS) with backup generators.
- Fully routed BGP Dual Ring multi homed network to provide resilience.
- 24 x 7 Continually monitor your server and notify you via sms/email of any issues.
- 12 Month Minimum Contract.

Traffic is measured at the switch port level. This means all traffic in and out of your machine is accounted for, including that to other machines on our network. If your inbound and/or outbound traffic for a month is above the agreed traffic level then we will bill you for the higher of the two, not both. We understand that there is a certain amount of broadcast traffic on our Lan and take this into account when billing.
